Latisse Eyelash Enhancer
Patient Consent

Patient Name: _____ _____DOB: _____ Date: _____

Known Allergies: _____

Please circle Yes or No to all of the following questions:

1.	Do you have glaucoma?	Yes	No
2.	Do you use prescription eye medication?	Yes	No
3.	Have you had Lasik surgery or any other eye surgery?	Yes	No
4.	Are you under the care of an ophthalmologist for any other eye condition?	Yes	No

If you have answered yes to any of the questions above, please consult with your ophthalmologist before using Latisse.

- If you wear contact lenses, they MUST BE REMOVED prior to the application of Latisse.
- Do not use Latisse if you have an active eye condition, including an eye infection or have broken or irritated skin on your eyelid.
- The most common side effect after using Latisse solution is an itching sensation in the eyes and/or eye redness. Latisse solution may cause skin darkening, eye irritation, dryness of the eyes and redness of the eyelids. There may be brown spotting pigmentation of the colored part of the eye which may be permanent (most commonly in blue eyes).
- Do not use Latisse if you are allergic to one of its ingredients.
- Latisse solution is intended for use on the skin of the upper eyelid margins at the base of the eyelashes. DO NOT apply to the lower eyelid lashes.

Please note: This is a prescription medication and cannot be returned or refunded. _____
Initials

I have read and understand the information regarding Latisse solution.
