KYBELLA™ (deoxycholic acid) injection is indicated for improvement in the appearance of moderate to severe fullness associated with submental fat, also called "double chin," in adults. KYBELLA™ is injected into the fat under the chin. Injections will be given at least 1 month apart. Dr. \_\_\_\_\_, in conjunction with the patient, will decide how many treatments are necessary. KYBELLA™ is intended to treat isolated submental fat; it has no effect on excess neck skin. After dissolving fat, any excess skin may be more prominent.
